

CHEMICAL PROCESSING INDUSTRY

Petrochemical, specialty chemicals, plastics, resins & Miscellaneous chemicals

Industrial Info's coverage of the Chemical Processing Industry encompasses a broad range of products, including petrochemical and inorganic chemicals, plastics, detergents, paints and pigments, and more. Our global market intelligence is consistently updated on active capital and maintenance projects, operational and pre-commissioned plants, as well as details on the units and equipment on-site.

- Major Capital & Maintenance Projects
- Equipment Details
- Unplanned and Planned Unit Maintenance
- Key Management Contacts
- Plant and Unit Information
- Latest Industry News Alerts

MAJOR PROJECTS

Capital and maintenance projects and key contacts that are constantly updated and tracked from the planning stages to the construction and start-up phases.

ETHYLENE MARKET

Industrial Info's Global Ethylene coverage helps identify, pursue, and track opportunities associated with maintenance turnaround work for operational ethylene production units.

UNITS/EQUIPMENT PROFILES

Operational, pre-commissioned and decommissioned units, including compressors, pumps, power generation as well as chemical processing units. Includes start/stop dates, actual & designed capacity, and more.

PLANTS

Profiles for operational, pre-commissioned and decommissioned chemical facilities, with up to eight management contacts.

UNIT MAINTENANCE EVENTS

Historic, ongoing and future maintenance events for ethylene crackers, methanol, ammonia, fertilizer, nitric acid, sulfuric acid, air separation units and more.

LONG-TERM SERVICE AGREEMENTS

This information is integrated with Plant data to help users track Long-Term Service Agreement (LTSA) details.

SECTORS IIR COVERS

Petrochemicals, Industrial Organic Chemical Producers

Producers of olefins, alcohols, ethylene and ethylene-based chemicals such as ethylene oxide/ethylene glycol, propylene, methanol and related products.

Industrial Gases

Manufacturers of hydrogen, nitrogen, oxygen, argon and other industrial gases.

Plastics, Rubbers, and Resins Manufacturers

The manufacturing of synthetic resins, plastic materials (polyethylene, polypropylene and similar commodities), nonvulcanizable elastomers, synthetic rubber by polymerization or copolymerization.

Fibers

Manufacturers of manmade non-cellulosic fibers, such as fluorocarbon fibers, elastomeric fibers, acrylonitrile fibers, nylon fibers, polyester fibers, and similar commodities.

Chlor-Alkali

Producers of caustic soda, soda ash (not produced at mines), chlorine (compressed or liquefied), and carbonates (potassium and sodium).

Industrial Inorganic Chemicals (Specialty Chemicals)

Major companies engaged in the production of acids, compounds (sodium, phosphate, etc), activated carbon, chemical catalyst, peroxides, and similar chemicals.

Agricultural Chemical Industry

Bulk liquid and solid (granular, powder) agricultural product producers, including fertilizers, herbicides, pesticides, fungicides, and intermediates, such as urea, ammonia, nitric acid, and ammonium nitrate.

Pigments

Manufacturers of pigments & titanium dioxide. Products include ferric oxide pigments, inorganic pigments, iron oxides, and paint pigments.

Producers of Other Chemicals

Producers of a variety of chemicals, including explosives, surfactants, inks, dyes, detergents, glues, lubricants, paints and coatings, solvents, fire retardants, chemical preparations, and the compounding of purchased plastics.

Surfactants

Manufacturers of surface active agents, emulsifiers, finishing agents, wetting agents and similar chemicals.
