

# TRANSMISSION & DISTRIBUTION INDUSTRY

## Stations and Distribution Lines

Industrial Info's Transmission & Distribution coverage zeros in on this evolving sector of the Power Industry. Global investments in Transmission & Distribution have been steadily increasing over the past few years and are expected to reach into the hundreds of billions of dollars over the next 15 years. Much of this investment is necessary to support the global expansion of new generation sources, particularly in renewable energy. The need to expand and modernize infrastructure for a wider customer base is another key driver in this sector. In many parts of the world, there is a movement to close existing fossil-fuel power stations, making it necessary to bring power to load centers from other sources. Across world regions, demand from growing industrial installations is driving the need for Transmission & Distribution system improvements.

### PROJECT REPORTS INCLUDE:

- Parent Company, Owner, and Operator
- Project Milestone Dates (Funding, Bid Doc, RFQs)
  - Project Scope of Work
  - Planned Kick-off Dates
  - Key Project Contacts
  - Total Investment Value

### SUBSTATION PROFILES INCLUDE:

- Utilities and Systems Owners
  - Owner and Operator Name
  - Physical Address
- Company Address and Name
  - kV bus Ratings
  - Other kV details

### MAJOR PROJECTS

Capital projects and key contacts that are constantly updated and tracked from the planning stages to the construction and start-up phases.

### STATION DETAILS

Use our online platform to search for details on operational, pre-commissioned and decommissioned substations, switching stations, and more.

As infrastructure development and improvement grows, the Transmission & Distribution Industry spending continues its upward trend. Industrial Info's global coverage includes details on capital project spending, such as grassroots substations and transmission systems, upgrades, modernizations and replacements. Industrial Info tracks Transmission & Distribution projects worldwide.

## TRANSMISSION & DISTRIBUTION COVERAGE

GEOGRAPHY	North America	Asia	Europe	Africa	South America	Oceania
PROJECT COUNT	2,409	5,930	523	1,489	1,525	237
TIV (USD)	\$90.7 Billion	\$84.8 Billion	\$33.7 Million	\$24.2 Billion	\$27.5 Billion	\$23 Billion
SUBSTATION COUNT	11,262	7,733	1,755	1,332	1,231	88
