

COMPANY FACT SHEET

Industrial Info Resources

Global industrial market intelligence built through first-hand primary research since 1983.

COMPANY OVERVIEW

Industrial Info Resources (IIR) is a global provider of industrial market intelligence built through first-hand primary research. Since 1983, IIR has helped organizations identify project opportunities, evaluate markets, monitor industrial activity, understand operational assets, and make informed business decisions.

IIR's research teams communicate directly with plant owners, operators, engineers, project stakeholders, contractors, and other knowledgeable sources to verify information on industrial facilities, projects, companies, equipment, and operational activity.

CAPITAL PROJECTS TRACKED

The 216,000+ capital projects are included within the combined capital and maintenance project total. Figures are as of July 2026 and are continuously updated.

WHAT IIR TRACKS

- Industrial plants and facilities
- Capital and maintenance projects
- Companies and plant-level contacts
- Process units and installed equipment
- Planned and unplanned offline events
- Long-term service agreements
- Industrial spending and market forecasts
- Skilled craft labor supply, demand, and wages
- Industry news and market developments

INDUSTRIES COVERED

Electric Power	Chemical Processing
Oil & Gas Terminals	Metals & Minerals
Oil & Gas Pipelines	Pulp, Paper & Wood
Oil & Gas Production	Food & Beverage
Alternative Fuels	Industrial Manufacturing
Petroleum Refining	Pharmaceutical & Biotech

RESEARCH METHODOLOGY

IIR's intelligence is developed through direct, human-led primary research. Researchers verify information with knowledgeable sources and continue monitoring records as project schedules, facility activity, ownership, investment plans, and operational conditions change.

This approach allows IIR to connect broad market trends with the individual companies, facilities, projects, assets, and people driving industrial activity.

KEY MILESTONES

1983

Industrial Info Resources is founded to provide reliable, forward-looking intelligence on industrial facilities and project activity.

Global Expansion

IIR establishes research operations across five continents, combining global coverage with local language and market expertise.

**Integrated
Industrial
Intelligence**

IIR expands its intelligence to connect plants, projects, companies, contacts, equipment, operational events, labor data, and market forecasts.

2026

IIR launches IIR Envoy™, its Model Context Protocol server, enabling supported AI assistants and enterprise agents to access the verified industrial intelligence included in an organization's IIR subscription.
